

GLASS RAILING ON PROFILE GARDA 1 F Eco

Salb mounting with technical advice

GARDA 1 F Eco is a glass railing system that can be **mounted on slab (also called French installation)**. The glasses are held by a continuous aluminum profile without posts, with or without a handrail.

This profile is suitable for an outdoor use on **terraces with pedestal-supported slabs**. It can also be installed on **metal structures**.

Righetti offers you a complete glass railing system including laminated glasses and its **SABCO profile from SADEV**.

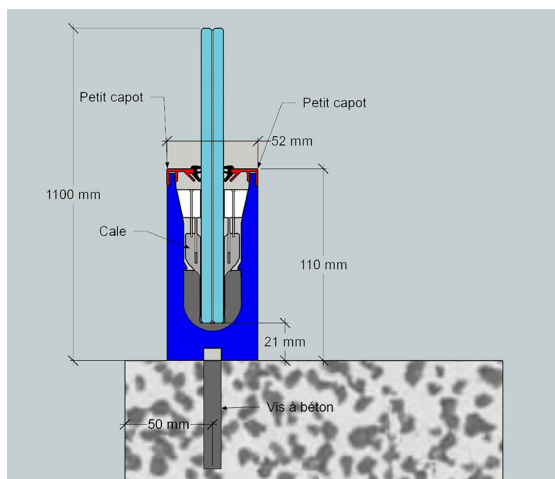

This profile is suitable for **EVA 66/2 tempered laminated glasses, for private use only**, and is validated by a **TECHNICAL APPROVAL**.

| Advantages

- Suitable for private use (0.60 kN)
- Our laminated glasses are assembled with an **EVA film**. This film has **hydrophobic** properties. They are therefore suitable for installations in outdoor and humid environments.
- Glass alignment adjustment during installation (+/-15mm).
- High rail rigidity for optimum support.
- Light, solid glass railing profile

| Mounting

■ GARDA 1 F Eco profile with small hood

| Technical Data

- Glass composition validated in the technical approval : **EVA 66/2 tempered laminated glass for private use only**
- Glass railing system installed on slab
- Maximum glass height tested on finished floor: 1100 mm
- Minimum width: 800 mm
- Profile installation to the slab: **in private places (0.60 kN)**: every 400 mm
- One spacer every 250 mm
- Profile section 52 x 110 mm standard length 2.5 m or 5 m
- Handrail can be added
- Optional HST (Heat Soak Test) glass treatment available
-

| Features

| Features | Values (mm) |
|--|-------------|
| Maximum glass width | 2 500 |
| Maximum glass height from the finished floor | 1 100 |
| Minimum glass width | 800 |
| Profile section | 52 x 110 mm |
| Distance between two fixings (pre-drilled) Private place (0, 6 kN) | 400 |
